

Craddock Fire Station Building Assessment and Upgrades

Location:
Portsmouth, Virginia

Owner/Client:
City of Portsmouth
801 Crawford Street
Portsmouth, Virginia 23704
757.393.8592

Cost:
\$78,000

Completion Date:
2004

We provided the city of Portsmouth a fire station assessment, recommendation, engineering, architecture and construction management to install larger overhead doors to accommodate the newer fire engines at Craddock Fire Station. This work was performed as a turnkey job to the City of Portsmouth. The scope of work included engineering for temporary shoring and permanent steel columns, beams and foundation. The construction management division performed the work in five weeks with minimum impact to the fire station.
