

Factory Street House New Foundations

Location:
Suffolk, VA

Cost Estimated:
\$150,000.00

Completion Date:
2010

ABC Consulting, Inc. performed a site investigation and report dealing with the structural system of the two-story duplex. The entire house needed to meet code since the owner could not tear down the duplex. The city would only let the owner build a single family home in its place. ABC Consulting, Inc. reinforced the entire structure including jacking up the house and installing a new foundation system under the duplex.
